

Vacancy:

Web Programmer Internship

- **Posted:** 24/08/09
- **Contact:** Russell Townsend
- **Location:** Birmingham
- **Contract:** 6 months initial internship

Overview of role:

As part of our growing team Clusta are offering an internship for a talented programmer to work at the Birmingham studio. The successful applicant will be working under the Digital Director in developing and building visual concepts for a range of medium including websites, animated banners, flash micro-sites, games and viral marketing. You should be detail oriented with the ability to function in a fast paced deadline driven environment. A passion for producing the most innovative digital media is imperative as is the ability to deliver complex work to challenging deadlines therefore core programming skills are imperative. The role offers the successful applicant the chance to broaden their skills and gain vital experience within the field of Digital Design.

Job Function:

- Responsible for the execution and production of various web and interactive based projects.
- Works closely with agency's Creative and Digital Directors to develop creative concepts.
- Works closely with both the Design and Development teams to produce collaborative works.
- Manages time spent to ensure projects are delivered on time and to budget.
- Works closely with Account team to manage client expectations.

Candidate Requirements:

You are quick, accurate, stress tolerant, a problem solver with good communication skills and a strong understanding of web applications and design sensibility.

- University Degree or Course equivalent in Computer Science.
- Comprehensive knowledge of coding, web deliverables and best practices in web design.
- Strong organizational skills, including the ability to manage your own projects, some simultaneously.
- A collaborative work ethic.
- Demonstrated ability to translate client goals into meaningful end projects.

Core Skills:

Strong programming and problem solving skills are essential. Require 2:1 or 1^{sts} in all Java programming modules.

Must have:

- Flash
- ActionScript 3.0
- HTML.
- SQL

Preferred:

- ASP.NET (2.0 / 3.5)
- C#,
- JQuery
- Photoshop / Fireworks
